KCA Welcomes Cole MinerD as Field Representative

By: Tyler Bowser

Kansas Cattlemen's Association recently welcomed Cole MinerD, El Dorado, KS, as part of its team to extend news and information for the association to the people of Kansas. MinerD will be traveling across the state to communicate with and educate producers on the current legislative issues KCA is handling. He will also speak with producers about the organization and work on increasing KCA membership.

MinerD graduated in May from Kansas State University with a bachelor's degree in Animal Science. Before his career at Kansas State, MinerD spent two years at Butler Community College in the Farm and Ranch Management Program and a year at Northwestern Oklahoma State, where he was a member of the collegiate rodeo team.

MinerD has an extensive background in agriculture production. He has worked for cow-calf operators and purebred producers dealing with heifer development as well as wheat pasture grazing and intense grazing systems with stocker cattle.

"I am looking forward to my time here; KCA is an outstanding organization that stands for the interests and well-being of cattle producers like my friends and family. I have been involved with production agriculture from a young age, and I understand the hardships and issues producers face on a daily basis. I will be able to relate and offer an honest opinion and will do my best to help wherever I can," said MinerD.
